VFR manual reorganization

Croatia Control Ltd. will carry out a VFR manual reorganization from mid-2021 till end of 2022 according to user suggestions with a goal to improve publication quality of VFR related aeronautical data and information.

The content of VFR manual will be adjusted to the rules and needs of VFR flying, which will bring changes in GEN, ENR and AD part.

Certain parts of VFR manual that are not relevant to VFR operations will be removed, while certain parts will be added or moved within existing chapters for easier navigation and faster retrieval of desired content. The VFR manual reorganization will be reflected in changes in the electronic and paper form of the manual.

The reorganization will be implemented in stages, through VFR AMDTs during 2021 and 2022, in accordance with the planned publication cycles of VFR AMDT.
